1. Luggage rack 2in1 - AJP PR7
2. Tablet Kit AJP PR7
3. Replacement plastic tablet holder
4. USB Charger for AJP PR7
5. Height reduction 2in1 - PR7
6. Height reduction – 40 mm
7. Height reduction – 25 mm
8. Throttle Limiter
9. Radiator cover
10. Wheel spacers PR7

1. Luggage rack 2in1 - AJP PR7

This luggage carrier designed by us for the AJP PR7 is a proven reliable design that has been used by many riders on their offroad trips for many years.

All parts of the assembly are CNC machined in premium quality, including radius shrinkage of all edges. Manufactured from ENAW 5083 aluminum alloy, ELOX finish in various colors and color combinations. Basic colors are black, white (natural aluminum color) and its combinations.

The advantage of our luggage carrier AJP PR7 is:

One side holders + 2 sizes of exchangeable luggage plates. When you remove the small plate, you can install the large plate in a moment and go on a long off-road trip.

The sophisticated side mounts include holders for mounting side bags or other straps you need to attach. The material thickness of the brackets is 12mm. Weight of a pair of side brackets = 840g. Small plate with dimensions 300 x 230 and thickness 5mm with maximum lightness - weight 620g

Large plate with dimensions 600 x 410 and thickness 5mm with maximum lightness and anchoring lugs. The plate can be mounted in six different positions and rotated 180°. This plate can be used to anchor 60L + 20L luggage or a tent and other small items. Weight 2500g.

Supplied with stainless steel fasteners.
Can be ordered as a set or separately.

Product Notes:

- If a small plate is fitted, the saddle can be removed.
- If a large plate is fitted, the saddle can be removed when the plate is removed.

2. Tablet Kit AJP PR7

PR7 tablet KIT - mount and power supply. The tablet can be removed in a seconds and the USB cable disconnected, which the original tablet mount and power supply does not allow!!

A simple twist of the quick release clamp removes the tablet from the cockpit of your PR7.

With this TABLET KIT AJP PR7 you can easily remove the tablet at any time!! Prepare your route for the next day at home, connect to the charger or to your home PC. Of course, the tablet can be tilted. Simply choose the tilt of the display and tighten the quick-release button.

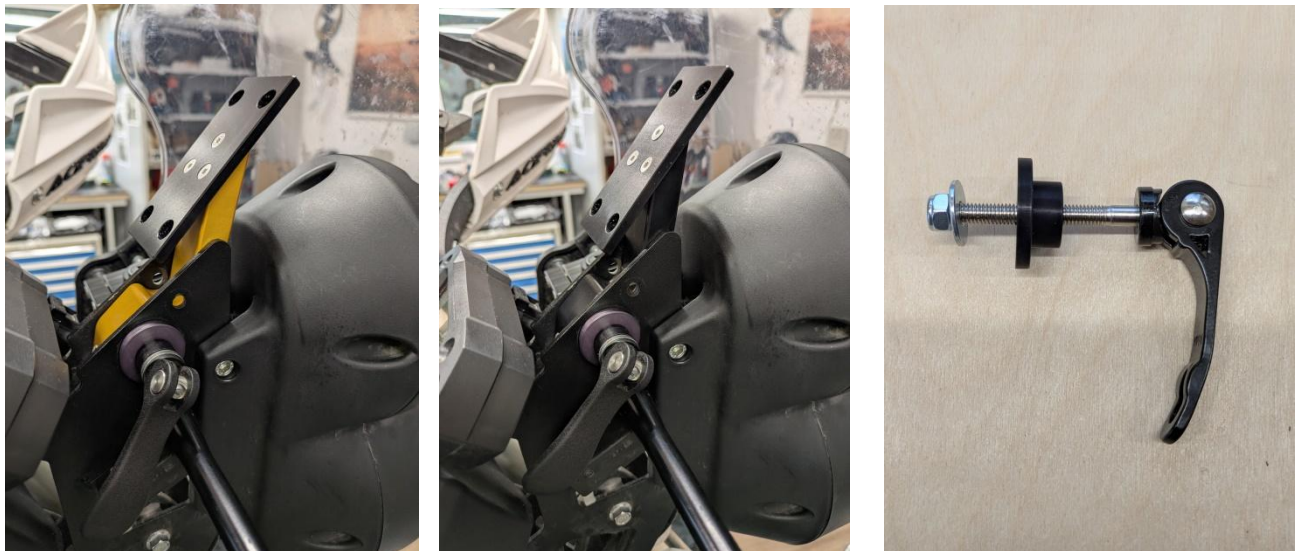

The tablet holder is CNC machined in premium quality, including radius shrinkage of all edges. Manufactured from ENAW 6082 aluminum alloy, ELOX finish. Basic colors are black, white (natural aluminum color) and its combinations. Colors available on request: red, gold.

The AJP PR7 TABLET KIT includes: tablet holder, USB connector with cable, USB-C slim cable, stainless steel fasteners, premium quality quick-release clamp from KIPP and detailed photo assembly instructions. Anyone can install the AJP PR7 TABLET KIT and connect the cables.

Product note:

We recommend buying this product together with an external USB charger made for the AJP PR7, which is not included in the AJP PR7 TABLET KIT.

3. Replacement plastic tablet holder

The tablet holder is CNC machined in premium quality, including radius shrinkage of all edges. Manufactured from ENAW 6082 aluminum alloy, ELOX finish. Basic colors are black, white (natural aluminum color) and its combinations. Colors available on request: red, gold.

The set includes a tablet holder, a premium quality quick-release clamp from KIPP with a pad and connecting material and detailed photo assembly instructions.

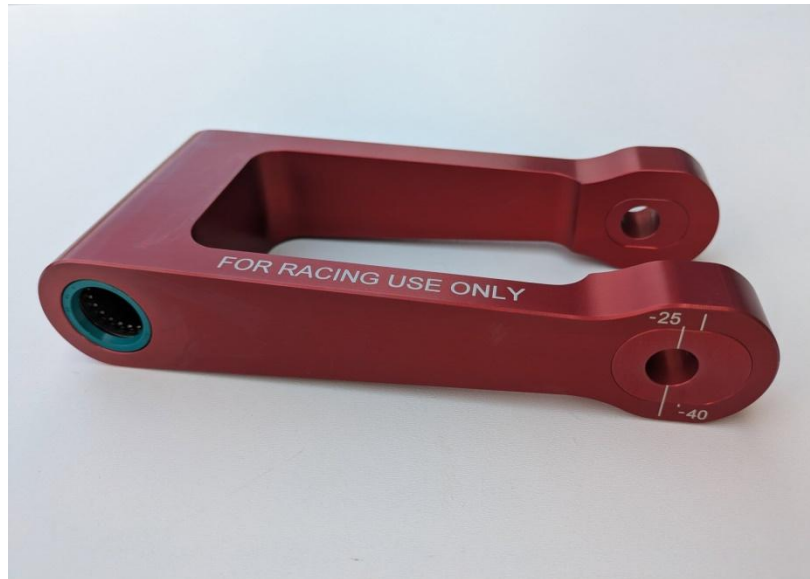

4. USB Charger for AJP PR7

The design of our double USB charger is specially adapted for use on the AJP PR7. The charger body is CNC milled including radius shrinkage of all edges. The material used for the charger body is black POM-C plastic. The charger body is fitted with a double built-in USB charger with blue backlight and integrated touch switch. Charger supports Qualcomm Quick Charge 3.0. A 150cm long power cable with fuse and stainless steel fasteners are included.

This socket for the AJP PR7 connects directly to the motorcycle's accumulator, so you can charge your accessories without turning the ignition key. The power-on mode is indicated by the USB connectors backlight.

5. Height reduction 2in1 - PR7

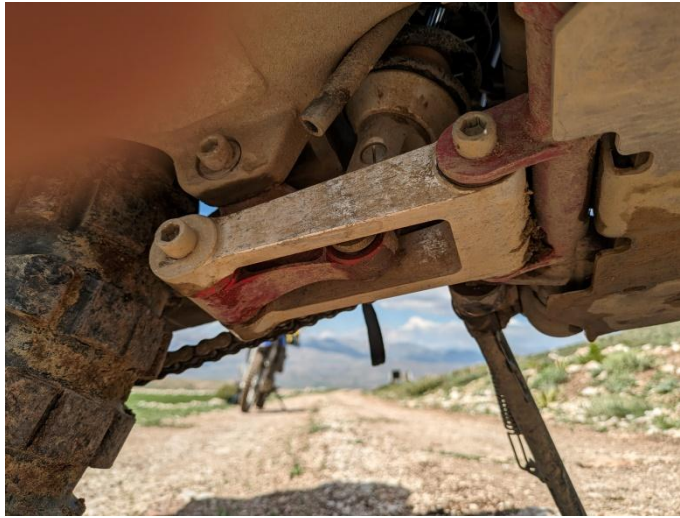

Allows 2 height adjustments in one part. By turning the inserts you can adjust -25 or -40 mm. The fork is CNC milled from high-strength aluminum alloy ENAW 7075 - ELOX red surface finish. High-quality SKF bearings and rubber sealing rings are pressed into the fork.

Using this part will reduce the seat height by 40 mm or 25 mm. From the original seat height of 920 mm to a height of 880 mm or 895 mm.

Product note - FOR RACE USE ONLY

6. Height reduction – 40 mm

Using this part will reduce the saddle height by 40 mm. From the original saddle height of 920 mm to a height of 880 mm.

The fork is CNC milled from high strength ENAW 7075 aluminum alloy - ELOX finish in red. Gold color available on request. In the fork are pressed quality SKF bearings and rubber sealing rings.

Product note - FOR RACING USE ONLY

7.Height reduction – 25 mm

Using this part will reduce the saddle height by 25 mm. From the original saddle height of 920 mm to a height of 895 mm.

The fork is CNC milled from high strength ENAW 7075 aluminum alloy - ELOX finish in red. Gold color available on request. In the fork are pressed quality SKF bearings and rubber sealing rings.

Product note - FOR RACING USE ONLY

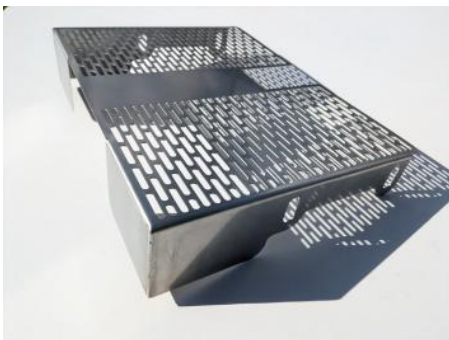

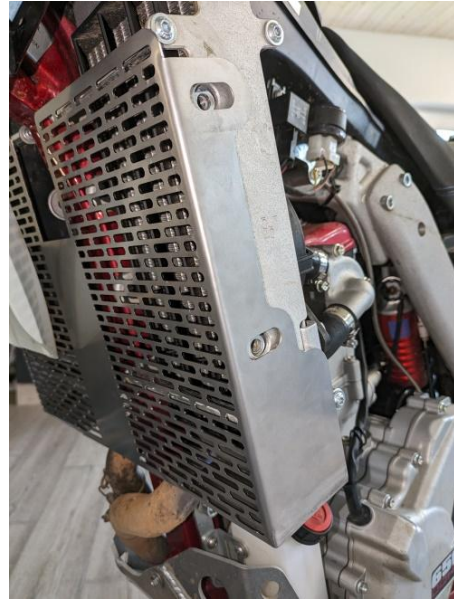

8. Throttle Limiter

Engine jerking at low speed PR7? Does the jerky throttle response at low engine speed bother you? In heavier terrain, this feature of the PR7 is particularly annoying. We have a simple solution to significantly reduce this characteristic.

The solution is to fit this small component. It will ensure that the intake throttle opens more slowly at first. This will significantly calm the throttle response. I've put 15 000 km on my PR7 with this and it really works. This fact has been confirmed to me by a many of satisfied PR7 owners from around the world who have ordered this product.

9. Radiator cover

PR7 radiator cover is made of 1 mm thick stainless steel sheet. It provides enough rigidity against rocks and branches. It also protects the lower part of the radiator, which is not hidden under the plastic. This radiator cover can be used on the radiator itself as well as on the radiator on which the side reinforcements are mounted.

10. Wheel spacers PR7

Stainless steel replacement ensures long life for your wheel bearings. Suitable for model (March 2022 +).

PR7 - Front wheel spacers

PR7 - Rear wheel spacers

PR7 - Between bearing posts FRONT + REAR

Products	price excluding VAT: for non-European customers and companies	price including VAT: for European customers
Luggage rack 2in1	207 €	250 €
Tablet Kit AJP PR7	99 €	120 €
Replacement plastic tablet holder	70 €	85 €
USB Charger for AJP PR7	66 €	80 €
Height reduction 2in1- PR7	190 €	230 €
Height reduction -25 mm	178 €	215 €
Height reduction -40 mm	178 €	215 €
Throttle Limiter	10 €	12 €
Radiator cover	87 €	105 €
Front wheel spacers	40 €	48 €
Rear wheel spacers	43 €	52 €
Between bearing posts FRONT + REAR	41 €	50 €

When ordering 3 or more pieces of one product, it is possible to arrange a discount. Individual price offers can be prepared for business partners and AJP dealers.

We can supply clothing to complement your AJP equipment on request.
